

Jobs Zone :: Classified ads script for jobs based on industry

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Jobs Zone was designed to target a specific industry one at a time. Jobs Zone has many features like an extensive jobs resume system which includes a separate head for education, references, experience and affiliations. An employer can see it separately or all together for a job seeker. A job seeker can at any time add/edit/delete these affiliations, education, reference and experience details. There is a search facility for employers in their account which they can use to search for a right candidate. We have provided an extensive admin panel for this website where you can edit/delete the user accounts. Provide them with a facility to search, See and enable the jobs posted, create and manage news, a link exchange system, send newsletter to the registered users and more. Please see the demo site for more details. All our customers and clients receive free upgrade of any new future versions of this script.
