JobSite Professional is a powerful and responsive php software for creating multi-user online jobs portal websites. It has various features for the employers to post jobs, make them featured, upload banners, search in the database with job seekers resumes and others and also for the job seekers to apply for jobs, create their resume online etc. The software has various plugins coming by default like Indeed, SimplyHired and CareerJet back fill plugins, Facebook connect and many others. It comes with a front site (fully customizable and template based), job seekers administration space (with functionality for the users to edit their profile, see the job offers, create and manage their resume etc.), search the database with the job seeker resumes and many others) and an advanced administration panel (providing full control over the website, its content and settings). It's provided with the full not encrypted source codes, free installation and support and free powered by removal.
