

Joomla vBulletin Duo-Sync Bridge

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

CB 1.0.2, CB 1.1, CB1.2 support. This joomla component can be used for synchronization of Joomla with the famous forum software vBulletin 3.6.x, 3.7.0 & 3.8. The main advantage of this joomla vbulletin bridge over other bridges is that our extension is installed to your system without modifying the core files of both your Joomla and vBulletin. This will allow you to update your systems much easier than if you had them modified. This will allow you to install any other joomla components on your site without any limitations that can usually be found in other bridges. Please carefully read the help section as we put much efforts into this component and we hope it will be very useful for you.
