

# jQuery Form to Form Wizard

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This powerful jQuery script turns a FORM into a multi-step FORM wizard. Simply group logical elements within your FORM by surrounding them with the FIELDSET element, and the script does the rest in creating a new page for each group, plus the appropriate "Steps" text and pagination links above and below the form.
