jQuery Navigation Menu Style 10

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

jQuery menus are different than other plain ul' CSS and HTML menus, they bring life to your site. They make your site recognizable, memorable for the users. Javascript makes it possible to create more interactive, more responsive and more flexible navigation to any website. Ranging from simple buttons and horizontal simple menus to dropdown and even menus with cool Lavalamp effect. For users without javascript, it falls back on a CSS menu system
