

.jQuery Notification Messages

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Included in the package are styles for error, success, info, and notification. You can see them all in the screenshot. If you want, you opt not to use the jQuery part of the package. Just don't include it. If you do use it, messages will fade in, give a little shake, and fade out when the user clicks them.
