

JS Shoppe Generator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The JS Shopping Cart Generator is a JavaScript program that generates a shopping cart which may be used for e-commerce purposes. It doesn't need any other scripting languages to run. It works independently on most browsers which are javascript-enabled. With Shopping Cart Generator v1.2, you can also work with PHP for processing the cart information. Variables are identified along with the program.
