

JSiteMap - Dynamic Site Map Generator

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

JSiteMap is an open source applet which allows you to easily generate a dynamic site map for your website. It converts a static HTML-only map (easy to create) into a dynamic javascript tree structure. There are two versions: applet and application.
