

jSocial Script

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This script uses the jQuery framework and works completely client side. So you can use it on static and dynamic webpages. The information to submit to the social networks like the title/url/description/keywords are automatic retrieved from the html page itself so you don't need to configure it.
