

# JSP Chat Application Script

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This is web based chat application using servlets and jsp, which supports rooms. Doesn't use any database or activex controls etc. Will work on all browsers as it uses simple html. It is for you to see how java can be used to create a simple web based chat application. You can download source code and try to see how everything is working.
