It allows accessing Oracle Databases, with NO code writing, utilizing a three steps simple wizard. JspGenerator is a powerful code generator that helps web developers and non-programmers create database-driven web applications in a matter of hours. You may use it to easily create any types of web forms and grids, such as User Registration Form for the web site or an Event List, or you may generate full-featured Employee Directories, Forums and Task Management Systems up to advanced Online Auctions, Stores, Portals and Intranets. JspGenerator produces a consistent look and layout across several pages, thanks to its facility to save layout configurations (Like templates) you can re-use, as many times you need. Additionally at design time you can choose colours, backgrounds, logos, etc on an easy way. Really you will appreciate this tool.
