

# jsTemplate

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

jsTemplate is JScript port of the PHP Base Library - Template class. jsTemplate is targeted at the ASP application developer. It is designed for use with a template system, and will help you build any size Web application by separating the programming and design logic. jsTemplate is distributed with extensive documentation and examples illustrating its features. Requires JScript Engine 5 or higher.
