

JXHTMLEEDIT - WYSIWYG XHTML Editor

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

JXHTMLEEDIT is a cross-platform WYSIWYG HTML/XHTML content authoring tool, a very small Java applet based on the Java 2 Platform. JXHTMLEEDIT provides word processor-like user interface that allows to edit the document directly in the final form (as will be rendered). JXHTMLEEDIT is flexible and could be used to easily integrate WYSIWYG authoring functionality into existing products or services. Applet jar is less than 150 KB, loads very quickly.
