

Kaos hit counter mk2

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This hit counter allows you to track site visitors by browser session. It uses a flatfile XML source to hold the counter values - no database required. It has the ability to track an almost unlimited number individual counters (you could theoretically have 75,000 counters or so). The value that is returned by the function is specified by you as well.. The script gives you complete control over its functionalities.
