UltimateMenu is a popup menu control for ASP.NET. Visual Designer fully integrated into Visual Studio. Create menus in different forms such as pop-up, drop-down, filter, transition, vertical, horizontal, scrolling, tabview and so on. Load menu from a data source and display a different menu based on user permissions. Display traversal path in one style and actual path in another. Use as a context menu and attach clicks to page or controls. Search engine optimized rendering. Supports frames.
