Mobile Number	{value_mobile_number}
Email	{value_email}

KbaseFree provides a quick, concise and inexpensive way to display dynamic information on a Web Browser, via an Intranet or Internet Web Server. Once the System Administrator has installed Kbase, Department-based personnel create & maintain text files for information on desired topics. In addition, one control file is created and maintained for all topics. If each department needs their own Kbase System, simply modify the installation to create a totally new Kbase area on the Web Server.
