Email	{value_email}

KbLance is a PHP and MySQL powered knowledge base management system that allows users to easily create and maintain a FAQ, documentation system, or complete support knowledge base. It features search engine friendly URLs, unlimited articles, (sub)categories, file attachments, article comments, ratings, glossary, full-text search, related articles, WYSIWYG editor, and a completely customizable template/style system which is based on Smarty. Advanced features include reusable article components, the ability to publish or unpublish articles, and featured articles. A complete Web-based control panel is included, and an installation wizard allows for easy setup.
