Kmita Tell Friend is a site recommendation script in ASP and PHP. It allows your website visitors to suggest your website to their friends and relatives. This increases your website popularity among your focused customer segment. Kmita Tell Friend is a template driven script and you can have unlimited templates, each customised to the content of the page which is recommended by the visitor. The Script can block specified IP's , IP ranges, domain names, domain name extensions for webmaster to take anti-spam measures. The script installs in 3 simple steps and gets you running within 10 mins. Automatic Setup Utility is an installation wizard which asks questions and makes all configuration files required on the server. You do not require to open a ASP file ever! Very Easy to install and use.
