

# Language Redirector

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

It detects the user's preferred language and redirects him to a specified target. You can specify up to 10 languages. You can also set a standard language which will be used if no matching user language where found. A full setup-script is included.
