In version 3, we introduced our brand new beautiful and super easy-to-use admin user interface with smart features like real-time previews. It follows every WordPress standards starting with the look and feel, and it takes advantages of the WP core features such as contextual help menus, the new Media Library with mass upload, WP Pointers, color picker and others. It also has perfect WordPress integration under the hood, it is multisite, localization and translation ready. We have implemented smart responsiveness, thumbnail navigation, skin editor among other new features. Most recently we released version 4 with more than 170 breathtaking 3D & 2D transitions. There is a transition builder, an easy-to-use visual editor to create your own custom transitions with almost infinite possibilities. The plugin now uses hardware acceleration, so it gives you killer performance on mobile devices as well. We have added auto-update feature, and we improved and fixed much like anything else.
