Mobile Number	{value_mobile_number}
Email	{value_email}

Never embed HTML in your code again with libtemplate. Easy to write and modify template files store all of your presentation layer. Set the value of template elements in your program, parse the template, and write the results to screen or a file. Written in C, this library is small, fast and easy to use. Documentation and a sample program are included in the library. A separate Windows DLL binary may be downloaded.
