Programming Microsoft® Dynamics™ NAV is a new book from Packt that helps users to create, modify, and maintain applications in NAV 5.0, the latest version of the ERP application formerly known as Navision. Written by David Studebaker, Principal of Liberty Grove Software and a certified trainer for Microsoft® Dynamics™ NAV, this book takes users through the important topics of Microsoft® Dynamics™ NAV with clear explanations and practical example code. This book will ease users through the complexities of NAV application development. Users will learn the skills and develop the confidence to tackle their own critical NAV applications. This book will act as an experienced NAV programming mentor, helping users to become productive as a NAV developer much more quickly. Fast-paced and to-the-point, this book takes users through the important topics of Microsoft® Dynamics™ NAV with clear explanations and practical example code. The reader does not need previous experience with NAV.
