LightBox PHP

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

You can use it to allow a client to preview, and eventually download a series of shots and to choose and download only the ones he likes. No thumbnails or preview files will be created into the source directory because the script generates them on the fly. Just one line of code setup! no programming skills are required! Blue and Dark themes provided but easily customizable for suit client's requirements.
