The Link Back Checker php script is an unique and powerful link back checking solution php script. Link Back Checker is a PHP/MySQL powered script that handles link back checks easy and fast! This script is a real money maker! Every webmaster need linking partners, so that when search engines like google gives them a rating, it gives them a rating based on how many sites links back to their site and vice versa. What happens if one of your linking partners remove your link and you dont know about it? You giving them a free link to their site then! With the link bank checker script, you and/or your members get an email weekly letting them know who is and who isn't still linking to them. They of course pay you for this service. With the Link Back Checker script, your members can send all new link partners to your site to get the correct linking format you want them to use. Once they put your members link on their site, they can submit a form to that member and your member can verify...
