

Link & Display Text Files

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

This example code demonstrates how to link and display text files within a single document in ASP. Using the title of the text files as hyperlinks, when clicked the file name, the full contents of the document will be displayed. Very useful for making copybooks and file layouts available online.
