MASTER RESELL RIGHTS FOR THIS SCRIPT AND OVER 100 MORE INCLUDED IN THE PRICE!!!  
TELNET UTILITY TO SORT OUT URL LISTS Ever need to go through a huge list of urls and filter out the dead links? Most webmasters do from time to time. Link sorter allows you to upload a simple ASCII one per line file of urls and run the script from telnet. The script goes through the list and sorts the urls into numerous lists of good urls, dead sites, redirects, etc. If you have a long list and need a break the program can be restarted from where you left off automatically.
