LinkScan is the industrial strength link checking and website management tool. It also does HTML validation and creates two types of publication quality SiteMaps. LinkScan is offered in two versions: LinkScan Workstation is a single-user implementation designed for individual content developers in large enterprises, and for organizations having smaller websites with up to 300 documents, and LinkScan Server is the complete multi-user, enterprise LinkScan implementation including LinkScan/Dispatch and handles extremely large websites comprising up to or more than 250,000 HTML documents and/or 100,000 external links.
