<b>Email</b>	{value_email}

Track the click history of any of your site links with this versatile and easy to use script. A detailed report is always available from the administration control panel so that you can monitor the progress of your visitors' clicks in real time. Daily, weekly and monthly clicks are logged for each link, together with an overall total and daily average. All link and site details can be modified from the control panel, where you can also configure e-mail notifications of current click totals.
