

Log Servlet

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

It is a Java servlet that allows you to collect information about your page visitors. You can put reference to this servlet inside your page and relevant information will be collected in the given log file. For your page, reference to this servlet looks like a graphical dot. Log file is a text file with tab separated values. Each line contains IP address, date, visitor's browser, referer page, visitor's charset, visitor's encoding, and visitors language (locale).
