

# Logging With PHP3

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This one page tutorial show you how to use PHP to display your site traffic statistics on the fly at any time. Along with its supplied PHP script, you will learn how to get access to your statistics that are continually updated, and that simultaneously support multiple sites, and multiple actions (page view, ad click, click-in, click-out, etc).
