

# Lookup Country, Region, State and City by IP Address

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

IP2Location™ is geolocation service provider that translates IP address to country, region and city. The free script allows you to lookup the country, region and city of the user by using his/her IP address. It can be used in projects such as: Developers use this component for projects related to: a) Display native language and currency, b) Redirect based on country, c) Digital rights management, d) Prevent password sharing and abuse of service, e) Reduce credit card fraud, f) Web log stats and analysis, g) Auto-selection of country on forms, h) Filter access from countries you do not do business with, i) Geo-targeting for increased sales and click-throughs, j) Detect spam emails.
