LUHN10 (Credit Card) Validation

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

A function that validates a credit card based on the LUHN10 algorithm. This function does not care if the number is a visa, mastercard, etc. etc. Pass the credit card number to the function, if it's valid true will be returned, if not, false will be returned.
