

# M&M Error Director

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

This script detects website errors, logs them and sends webmaster an email. It displays an error page to user. Error pages are not created by the script but are standard HTML pages so you can edit them to look like your site. It includes protection to prevent your directory from triggering the servers SPAM detection system due to too many emails being sent from your cgi-bin per day.
