Magento 2 Mobile Login

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Convenience is having core importance when it comes to login, payments or anything in Ecommerce. Default Magento only provides login and registration through Email ID. It's trend of more mobiles and thus people are now in search of mobile logins rather Email Id as it sometimes creates mess with people having multiple Email IDs. MageComp has come up with Magento 2 Mobile Login extension to provide your customers with mobile login apart from Email ID. Why choose Magecomp's Magneto 2 Mobile Login extension: • Users can register and login with their registered mobile number. • Users can even enter mobile number at checkout while entering billing information. • Admin can see registered mobile number of customer from backend. • Customers also can change their registered mobile number from their "My Account" section.
