

# Magento Delivery Distance Checker

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

The module allows shop owners to limit delivery area. It is especially required for services involved in food shipping though certainly the plugin will work for any business with similar purpose. The extension is easy to tune up. It is necessary to indicate shipping max. distance, original address and delivery mode (driving, walking and riding a bike) in System -> Configuration -> Shipping Distance Meter. At the checkout customer's address gets validated if it is eligible for shipping. Otherwise, no order is completed.
