Magento Estimated Delivery Date Extension

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Customers always would like to know the exact or approximate product shipping date, some carriers provide this information via gateways but some do not. In this case this extension can become a great solution when the store admin can specify delivery dates visible for customers himself. The notification can show either estimated delivery time or calendar date that is updated automatically; also any specified days can be disabled for shipping.
