

Magento Facebook All In One

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

The Facebook Like button is a feature, no store now can live without. The more likes you have, the more customers you have. The feature allows you to enable the configurable login button for all products in your store. The Send to Friends feature is a new one. It works almost as a Like, but allows you to send a direct message to an email, contact or group of your Facebook contacts. Facebook based Comments Comments system is a valuable feature for any store. It greatly increases the sales rate for a certain product. Share feature is a double one, as you can share your wishlist or the completed order on facebook. Recent activity block is a new social plugin that we have just implemented, it shows all related activities: Posts, Likes and Recommendations. All features are separately customizable and adjustable, including sizes, fonts and buttons.
