As Indian government launched Goods & Services tax popularly known as GST – “One Nation One Tax”, whole Ecommerce and online stores are in a hunt to implement GST in stores. If you are thinking to integrate GST in your Magento store, you’re at the right place. MageComp has come up with Magento Indian GST extension to integrate GST to auto create tax rules & calculate tax amount for store products and services. It allows adding GSTIN and shows everywhere with order details. Even it allows customers to add their GSTIN if applicable. The extension is developed aligning with Indian GST standards and norms.
