Mobile Number	{value_mobile_number}
Email	{value_email}

Magic Book Professional is our fully loaded guest book application. Like most guest books, it allows visitors to add their comments as well as name and email address to the book in an automated process. This application, however, goes way, way farther with features not found on any other guest book, period. Like the ability to use a PHTML (Pseudo HTML) based editor interface to add a bit of flair to otherwise boring entries. Or perhaps adding one or two of the over thirty emoticons, or smilies, to an entry. Other features included in the complete Admin section: optional removal of all HTML, the banning of "bad" words from entries, choose what questions will be found on the form and if they will be optional or required, optional email notification, optional email thank you note, change the applications colors, fonts, etc. in seconds all from a single page, plus much, much more! A fully functional online demo is available as well as a FREE, stripped down version, Magic Book Personal! Check it out!
