Magic Zoom is a tool that adds zooming to your Magento product images. Hover over a product image and a highly detailed image is revealed to the side. It is the best way to inspect products close-up. It gives customers confidence in the quality of the product and can lead to higher sales. A must-have extension for every ecommerce website. It uses JavaScript to create the zoom effect. The style is controlled with CSS. It works on all browsers (IE, Firefox, Chrome, Safari, Opera) but if you need it to work on iPad and iPhone, get Magic Zoom Plus which will enlarge the image on tap.
