View images with this incredible zoom tool. Simply hover over a product image and a highly detailed image is revealed to the side. It is a great way for visitors to see your images thoroughly. It uses JavaScript to create the zoom effect. The style is controlled with CSS. But you do not need to have any knowledge of either. It is simple to install, only takes 5 minutes. Magic zoom works on all major web browsers but if you need it to work on iPad and iPhone, get Magic Zoom Plus which will enlarge the image on tap. Please feel free to contact us if you need any help.
