Mail-In Rebates is a powerful and widely-used sales promotion tool, and now it's available for Magento! Mail-in Rebates is a great purchase incentive: it offers customers a partial rebate which is provided by the seller or by the manufacturer of the product. Such offer can stimulate purchase as much as a regular discount, but the seller can benefit more, because a) the manufacturer provides the rebate, i.e. bears the cost of discount, or b) not all the customers go through the trouble of claiming the rebate provided by the seller. This extension makes it easy for Admin to create and manage Mail-in Rebate offers, and for customers to navigate and search your store for special offers. Full list of features is available at the product page.
