Mail-This-Page

Address   {value_address}

Contact Person   {value_contact_person}

Mobile Number   {value_mobile_number}

Email   {value_email}

Mail-This-Page is a program written in Perl that gives visitors to a web page the ability to send copies of that page to any valid email address. The site owner simply inserts a small fill-out form into any webpage and he instantly gives viewers of that page the privilege to share the same content to anyone by sending a copy through email.
