

# Make Your CSS Menus Appear on Top of Forms

<b>Address</b>	{value_address}
<b>Contact Person</b>	{value_contact_person}
<b>Mobile Number</b>	{value_mobile_number}
<b>Email</b>	{value_email}

You have just finished creating or installing a killer CSS Drop menu for your website. There is only one problem, in IE6 the menu disappears where HTML form elements and Flash layers appear. Form elements and Flash in IE will always cover DHTML layers no matter what zIndex you have set. Here is tutorial on how to fix this using a very flexible menu script as an example.
