

Making CakePHP Templates in TextMate

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Automating the creation of templates will save you time. Expensive time that you don't need to waste on repetitive stuff. You can even modify the existing templates provided in the bundle editor. I know virtually every HTML document I create will need at least one stylesheet, meta data, and scripts.v
