Mambotastic Timesheets component gives Mambo and Joomla users a front end interface to enter and manage time spent on tasks using Mambo/Joomla as the base system. Features include Company Management, for multiple projects and multiple clients. Task Management, create every day tasks and take the time out of logging your timesheets. Project Management, separate your timesheet entries over different projects and identify time spent on each. Reporting Facility, create reports on a week by week basis for a number of different search criteria. Full Administration, administer your users timesheets with full access using the Mambo administration console. Integrated with the Mambo User Database. Mambotastic Timesheet is available under GNU License, and is free of charge
