

Matrimonial scripts

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Matrimonial script is a powerful PHP script exclusively for matrimony which is user-friendly in all bases including search, update, add/remove, and edit profiles from the database. Member registration includes feeding information like basic details, religious background, physical status, and profile insertion with a confirmation message. The matrimonial script includes features to login through id or email address along with finding forgotten password provision. The search feature of member id includes simple to complex functions where the member profile can accept updates including profile, photo, horoscope, change password and other interests.
