{value_mobile_number}
{value_email}

Do you have articles or pages of content that visitors could recommend to their friends? With Max Tell a Friend, not only do friends of the visitor get a recommendation email, but *you* also get an email letting you know that the webpage was recommended. With Max Tell a Friend, you install the exact same code on every page -- and it knows what the title of the page is, and where it is located. Visitors can email 10 friends or more, at once.
