

MB - Search Suggest and Auto Complete Magento Extension

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Search Suggest and Autocomplete extends Magento search and helps it run better for your online store. This extension uses Ajax to return match items with search query quickly. Moreover, the module configuration allows you to change the look and feel as well as customize search query to meet your requirements. Also, you can simply customize the dimension of product thumbnail image, and enable to display product description in the search results.
