Mercury Web Shipping - UPS, FedEx, and US Mail (Stamps.com) Shipping Labels

Address	{value_address}
Contact Person	{value_contact_person}
Mobile Number	{value_mobile_number}
Email	{value_email}

Install Mercury on your web server and eliminate shipping data entry with one-click shipping that can be integrated into any existing shopping cart system. UPS, FedEx, and US Mail shipping labels are generated using your own shipper accounts. Mercury communicates directly with the shipping carriers allowing you to keep track of your precise shipping costs, including negotiated rates. Your customer information and any other shipment details are received through a link from your existing system. You won't waste any time linking database fields, importing CSV files, using SQL or ODBC! Integrate Mercury with Zen Cart, OpenCart, PrestaShop, CRE Loaded, CubeCart, AgoraCart, StoreSprite, OScommerce, Magento, X-Cart, or just about any other shopping cart. Mercury can automatically send your customers a customized email notification with tracking number when a shipment is created.
